## **Mountaintop Secures TSA Contract for Client**

### **FOR IMMEDIATE RELEASE**

AITHERAS, LLC, an 8(a), SDB consulting firm based in Landover, MD has been awarded a \$443K contract from Transportation Security Administration Office of Acquisitions (TSA OA) for Records Management Support Services.

Since the inception of their agency, the TSA OA has faced a challenge in the maintenance of the documents produced by the contract award process. While TSA OA put forth a valiant effort in their management of this ever-growing collection of files, eventually the size of their collection made it logistically unreasonable to continue an in-house approach to managing their file room. This led TSA OA to choose AITHERAS for their file room management.

“Being awarded this contract attests to the high level of confidence that the TSA has in AITHERAS. This task was a true challenge because of the high volume of meticulous work that needed to be done. It brings me great pride to know that AITHERAS was selected for such an award.” - Andrew Milisits, Managing Partner of AITHERAS, LLC.

Approximately 10,000 contract award files within TSA OA were analyzed under this contract. AITHERAS was also responsible for organizing these files to ensure proper maintenance. The functionality of the TSA OA file rooms were renewed, while saving countless funds and hours they would have spent trying to maintain an in-house solution.
